Shenandoah Biotechnology Is Implementing ZenQMS Quality Management System

Warwick, PA: Shenandoah Biotechnology today announced they will be implementing the ZenQMS quality management system. Utilization of this system is expected to help Shenandoah achieve GMP-level compliance regarding production, verification, and validation of their manufactured proteins.

“As Shenandoah continues expansion into our newest GMP-grade protein production facility, we are confident with the selection of ZenQMS,” says Pamela De Lacy, President of Shenandoah Biotechnology. “ZenQMS is renowned in the life science community for their effortless solution to quality management, and we believe this partnership will free us up to spend more time improving customer experience.”

“We are proud to be a partner of Shenandoah Biotechnology and support their quality excellence.” Panos Boudouvas, Co-Founder and CEO. “This partnership underscores our shared value of the critical role that quality plays across the life sciences continuum.”

The benefits of this new application include overall GMP-level management of documents, records, training, process workflows, audits and non-conformities, which will lead to the improvement of the quality of their products and processes.

About Shenandoah Biotechnology: Shenandoah is an ISO 9001:2015 and WBENC-certified manufacturer of recombinant proteins for research use who produces 100% of their products in the U.S.A.

About ZenQMS: ZenQMS supports clients throughout their quality journey with its cloud-based platform for managing critical-to-quality activities. The company’s mission is to elevate quality management as a business imperative and to foster quality-driven growth. For more information, visit www.zenQMS.com.
