Recombinant Animal-Free Human BAFF / BLYS

Catalog Number: 100-24AF

Product Description

Alternate Names: TALL, BLYS, THANK

Accession Number: Q9Y275

Description: B cell-activating factor (BAFF), or B lymphocyte stimulator (BLYS), is a type II member of the tumor necrosis factor (TNF) superfamily. BAFF is expressed as a transmembrane protein on T cells, macrophages, and dendritic cells. The transmembrane domain of BAFF can also be cleaved to produce a soluble protein fragment. BAFF binds to the TNF receptors known as B cell maturation antigen (BCMA), transmembrane activator and CAML interactor (TACI), and BAFF receptor (BAFFR). BAFF is important for the survival and maturation of peripheral B cells. Human BAFF shows activity on mouse splenocytes.
